Annual Indexes

Volume I — October 1971 to July 1972

1. Subject Index

A

A Concept for the Burning-Out Mechanism of an Incandescent Tungsten Wire 309
Additives, Effect on Fluorescent Lamp Performance 195
Age, and Visual Performance 3
American National Standard Practice for Roadway Lighting 334
An Alternative Simplified Method for Determining the Acceptability of a Luminaire from VCP Standpoint, RQQ Report No. 3 256
Angle of Light, Effect on Evaluation of Faces 231
Application of Simulated Spectral Power Distributions in Lamp Development 285
A Practical Method of Extending VCP Calculation to Luminaires with Distribution in the 90-Degree to 180-Degree Zone 42
A Practical Xenon Follow Spotlight... 235
Area Sources Expressed on Angular Coordinates, Ilumination Due to 61
A Selective Getter for Metal Halide Lamps 222
Automatic Photometry for Manufacuring Use 305

B

Biological Effects of Light
  Blue Lamps in Phototherapy 112
  Visual and Biologic Aspects 33
Blue Lamps in Phototherapy of Hyperbilirubinemia 112
Book Reviews 185, 261

C

Calculation and Measurement for the Standard Classroom Task, Contrast Rendition Factor 128
Chromaticity Data on Metal Halide Lamps 191
Coffered and Surface Luminaires, Equivalent Luminance for 212
Color Coded Rear Lights, Motor Vehicles 135
Color Rendering of Fluorescent Lamps, Effect of Temerature 227
Color Rendering, Subjective Measurement of Color Shifts 239
Color Rendition vs Flattery 208
Color Shifts, Measurement of 239
Commercial Interior Lighting, with HID Sources 143
Contrast Rendition Factor Calculation and Measurement for the Standard Classroom Task 128
Cotton Gins, Lighting for 68

D

Design of Pulsed Alkali Vapor Lamps Utilizing Alumina, Yttria and Sapphire Envelopes 281
Determination of Average Luminance of Luminaires 181
Dynamically Stable Positive Resistance Arcs 25
  Discussion 166

E

Early Phtotometric and Electrical Changes in Incandescent Lamps and Their Relationship to Surface Characteristics of Tungsten Filaments... 274
Effects of Angle of Light on the Recognition and Evaluation of Faces ... 231
Effect of Temperature on the Color Rendering Properties of Fluorescent Lamps 227
Electrophotography, Light Source Improvements for 318
Enclosed Luminaire Performance with 40-watt Indium-Amalgam Fluorescent Lamps 105
Equipment, Engineering Data, IES Guide for Reporting 175
Equivalent Luminances for Coffered and Surface Luminaires 212

F

Financial Decision Technique for Choosing Between Alternative Lighting Systems 119
Flattery vs Color Rendition 208
Fluorescent Lamp Performance, Improved 195
Fog, Roadway Visibility 45

H

High Intensity Discharge Sources in Commercial Interior Lighting 143
High-Wattage High-Density Line Spectra Metal Halide Lamp 216
Hyperbilirubinemia, Blue Lamps in Phototherapy 112

I

IERI Reports
  Roadway Illumination and Visibility in Fog 45
  Visual Performance Data for 156 Normal Observers of Various Ages 3
IES Guide for Reporting General Lighting Equipment Engineering Data 175
IES Practical Guide to Photometry.... 73
Illumination Due to Area Sources Expressed on Angular Coordinates 60
Improved Fluorescent Lamp Performance Through Additives to Bulb Glass 195
Improvements of Light Sources for Electrophotography 318
Influence of Application Conditions on Lumen Output and Chromaticity Characteristics of Metal Halide Lamps 191

L

Lighting for Cotton Gins 68
Lighting of Tunnels, Recommended Practice 247
Lighting Systems, A Financial Decision Technique for Alternatives 119
Light Sources
  Additives to Bulb Glass 195
  Alkali Vapor Lamps 281
  Chromaticity, Metal Halide 191
  Electrophotography, for 318
  High Intensity Discharge 143
  High-Wattage, Metal Halide 216
  Incandescent Lamps 274
  Incandescent Tungsten Wire 309
  Indium-Amalgam Fluorescent 105
  Mercury Lamps 99
  Metal Halide Lamps 222
  Spectral Power Distribution 285
  Solid State Lamps 267
  Television and Film, for 300
  Temperature Effect on Color 227
  Tungsten Bromine Lamp 21
Light Sources and Photopolymerization 290
Luminaires, Coffered and Surface, Equivalent Luminances 212
Luminaires, Determination of Average Luminance of 181
Luminaires, Practical Method of Extending VCP Calculation 42

M

Maintenance and Adjustment Factors in Street Lighting Design Calculations 62
Mercury Lamp for Lighting People... 99
Metal Halide Lamp, High-Wattage High-Density 216
Metal Halide Lamps, Selective Getter for 222
Motor Vehicles, Color Coded Rear Lights 135

N

New Discharge Lamps for Television and Film Lighting 300

O

On the Role of Oxygen, Hydrogen, and Carbon in a Tungsten Bromine Lamp 21
  Discussion 168
Outdoor Lighting, Sound Criteria for.. 199

P

Photometry, Automatic for Manufacturing Use 305
Photometry, IES Practical Guide to... 73
Photopolymerization, and Light Sources 290

Q

Q-File Random Access Memory Control for Theatre and Television 329

R

Recent Developments in Solid State Lamps 267
Resistance Arcs, Dynamically Stable.. 25
Roadway Illumination and Visibility in Fog 45
Roadway Lighting
  ANSI Standard Practice 334
  Maintenance Factors 62
  Motor Vehicles, Rear Lights 135
  One-Way Highways 14
  Tunnels 247
  Visibility in Fog 45
RQQ Report No. 3, An Alternative Simplified Method for Determining the Acceptability of a Luminaire from VCP Standpoint 256

S

School Lighting
  Contrast Rendition Factor 128
  Prediction and Evaluation for 153
Semi-Directional Fixed Lighting for One-Way Highways 14
  Discussion of 169
Should Rear Lighting of Motor Vehicles be Color Coded? 135
Solid State Lamps, Recent Developments in 267
Sound Criteria for Outdoor Lighting.. 199
Street Lighting—See Roadway Lighting
Street Lighting Design Calculations, Maintenance and Adjustment Factors in 62
Subjective Measurement of Color Shifts With and Without Chromatic Adaptation 239

T

Technical Committee Reports, IES
  ANSI Roadway Lighting Practice... 334
  Average Luminance of Luminaires.. 181
  Cotton Gin Lighting 68
  Guide for Reporting Engineering Data 175
  Guide to Photometry 73
  RQQ No. 3 256
  Tunnel Lighting 247
Television and Film Lighting
  New Discharge Lamps for 300
  Q-File Memory Control 329
  Which Dimmer Curve for 325
  Xenon Follow Spotlight 235
Transactions of IES
  A Concept for the Burning-Out Mechanism of an Incandescent Tungsten Wire 309
  American National Standard Practice for Roadway Lighting 334
  Application of Simulated Spectral Power Distributions in Lamp Development 285
  A Selective Getter for Metal Halide Lamps 222
  Blue Lamps in Phototherapy of Hyperbilirubinemia 112
  Contrast Rendition Factor Calculation and Measurement for the Standard Classroom Task 128

Design of Pulsed Alkali Vapor Lamps Utilizing Alumina, Yttria and Sapphire Envelopes 281
Determination of Average Luminance of Luminaires 181
Early Photometric and Electrical Changes in Incandescent Lamps and Their Relationship to Surface Characteristics of Tungsten Filaments 274
Enclosed Luminaire Performance With 40-Watt Indium-Amalgam Fluorescent Lamps 105
Equivalent Luminances for Coffered and Surface Luminaires 212
Flattery vs Color Rendition 208
High Intensity Discharge Sources in Commercial Interior Lighting 143
High-Wattage High-Density Line Spectra Metal Halide Lamp 216
IES Guide for Reporting General Lighting Equipment and Engineering Data 175
IES Practical Guide to Photometry.. 73
Improved Fluorescent Lamp Performance Through Additives to Bulb Glass 195
Influence of Application Conditions on Lumen Output and Chromaticity Characteristics of Metal Halide Lamps 191
Lighting for Cotton Gins 68
Lighting of Tunnels 247
Prediction, Evaluation, and Specification of Visual Comfort and Performance in Classrooms 153
RQQ Report No. 3, An Alternative Simplified Method for Determining the Acceptability of a Luminaire 256
Semi-Directional Fixed Lighting for One-Way Highways 14
Subjective Measurement of Color Shifts with and without Chromatic Adaptation 239
Tunnels, Lighting of 247

V

VCP Calculation to Luminaires with Distribution in the 90-degree to 180-Degree Zone, Method of Extending.. 42
Visual and Biologic Aspects of an Artificial Sunlight Illuminant 33
Discussion 171
Visual Comfort and Performance in Classrooms, Prediction, Evaluation, and Specification of 153
Visual Performance Data for 156 Normal Observers of Various Ages 3

W

Which Dimmer Curve—Why? 325

X

Xenon Follow Spotlight 235
